FYI: While trying to get additional Goliad Project exploratory well information, I received the attached map from Mr. Art Dohmann of GCGCD. The map, it is my understanding, depicts the location of all wells drilled by all uranium operators who have played a role in this area, namely: Coastal, Moore Energy and UEC.

I infer from the above that this map includes all exploratory wells and cased wells. According to Neil Blandford of D. B. S. & A., Inc., the consultants to the GCGCD, the wells whose IDs are preceded by an "N" are the wells drilled by UEC. Otherwise, the wells are wells drilled in the early 80's. Mr. Dohmann said that he is pursuing obtaining the location description for this latter group of wells. Hope this helps,
